AESTHETICS • LASER • WEIGHT LOSS

Maria opened Manor Health in June 2012 as a weight loss and skin clinic. She is passionate about her business and aims to deliver the best treatments and results for her clients. To ensure these aims are met, Maria has invested heavily in the latest technology and will only offer treatments that she knows will produce the best results and value for money.

GOLD STANDARD

Manor Health offer the 'Gold Standard' in laser hair removal using the Duetto MT. The Fractional Laser Skin Resurfacing Treatment is award winning handheld technology, recognised at the 'My Face, My Body Awards' for the exceptional results it delivers on skin resurfacing, scar and stretch mark removal. These are just a few of the high quality treatments on offer at Manor Health.

Helping clients lose weight for the long term, and improve confidence and self esteem, is one of the most rewarding parts of the business. Overseeing the incredible transformation of a client, from the moment they come to Manor Health feeling insecure

and miserable about their weight, to them walking out happy and full of confidence is complete job satisfaction. Some of our very first clients continue to maintain their goal weight five years later, and we couldn't be more proud!

Before your treatment and any financial commitment, we offer a consultation and patch tests to ensure you receive the essential information required, and Manor Health determine the suitability of treatment. We want you to feel comfortable and confident throughout your visit, and deliver the best results possible for you.

ULTRASOUND FAT REDUCTION & WEIGHT MANAGEMENT

This clinic is for you if you are overweight, out of proportion or have stubborn areas of fat that you struggle to lose through diet and exercise. Pulsed acoustic ultrasound waves travel beneath the skin and target fat cells. Once a wave hits the fat cell it ruptures and emulsifies it. The fat moves out of the body through the lymphatic system and is then excreted. We also provide a bespoke weight management program to compliment the treatment. On average, our clients will lose two stone in 12 weeks.

	COURSE OF 6	COURSE OF 12	COURSE OF 18	MAINTENANCE
Stomach	£545	£890	£1260	£90

CELLULITE REDUCTION (RADIO FREQUENCY & VACUUM)

Cellulite Radiofrequency Therapy effectively reduces the appearance of cellulite on the legs, buttocks, thighs, abdomen and those dreaded 'bingo wings'. Up to 70% reduction in cellulite can be achieved.

Radiofrequency energy and vacuum is applied to the skin. This gently heats the skin's surface, which will tighten any loose skin. The radiofrequency waves then travel down and provide deeper heating which increases blood circulation; the vacuum causes lymphatic drainage of the fatty deposits and cellulite.

BODY BALLANCER®

The Body Ballancer® is a clinically proven medical treatment for **Lymphedema and Lipedema**. It also effectively **reduces water retention, cellulite, aids muscle recovery after exercise** or can simply be a **very relaxing massage**. The system performs a massage from the feet, up over the body, stimulating dermal and sub-dermal circulation. This encourages blood flow that increases nourishment to tissues and speeds the removal of excess lymph fluid, toxins and fatty acids.

	TIME	TREATMENT	COURSE OF 6

AQUALYX

Aqualyx, also known as Fat Dissolving

Injections, are an alternative and significantly less invasive treatment to traditional liposuction. This treatment is perfect for targeting specific fat stores such as the double chin, stomach, thighs, arms/bingo wings, saddle bags etc... This treatment is not for significant weightloss but is perfect if you have small pockets of fat. The Aqualyx treatment contains desoxycholan acid, a secondary bile acid. With the assistance of bacteria, our body is able to produce this acid itself in the liver in order to aid the digestion of fat. Professor Pasquale Motolese, the inventor of Aqualyx, developed a synthetically manufactured variant to mimic the fat-dissolving effect of this acid.

ANTI-WRINKLE TREATMENTS & DERMAL FILLERS

ANTI-WRINKLE TREATMENTS

Anti-Wrinkle injections cause the temporary relaxation of muscles. Aesthetic practitioners use them to decrease the appearance of facial lines and wrinkles. There are three main areas that may be treated: the area between the eyebrows (frown lines), the forehead (horizontal lines), and the area lateral to the eyes (crows feet). Advanced techniques also include: Hyperhydrosis (excessive sweating), Gummy Smile, Grinding Teeth, Dimpled Chin, Neck Lift & Bunny Lines.

Bunny Lines	£150
Nefertiti Lift (neck tightening)	£300
Masseter Muscle (slim jawline)	£200

DERMAL FILLERS

Dermal Fillers are designed to help smooth away wrinkles and lines by adding volume under the skin where it is needed most. Fillers can also be used to restore volume to sunken cheeks and thinning lips to give you that kissable smile you'll love.

We will carry out a full face assessment in your consultation and provide you with a bespoke treatment plan. We will also review your medical history and any medications you are taking.

We have a range of fillers available, all CE approved, including Juvederm, Teosyal, Restylane and Amalian. If a specific filler is requested we can order it in prior to treatment.

PROFHILO® is an EXCLUSIVE skin re-modelling treatment that will give you visible results in just two visits. This revolutionary NEW treatment takes just 10 minutes, with 5 injection points into your area of concern. It stimulates 4 different types of collagen and elastin due to the slow release of hyaluronic acid, and it is this stimulation that results in significant improvement of tissue quality.

PDO THREADS

PDO THREADS

PDO Threads are a 'non surgical' face and neck lift treatment. This minimally invasive procedure uses dissolvable PDO (Polydioxanone) threads to lift and tighten the skin by stimulating new collagen production, reducing wrinkles, tightening pores and creating volume. There is minimal downtime and the threads will be fully absorbed within 6 months. Results will last an average of 12 to 24 months depending on the treatment.

TESTIMONIALS

A big thank you to Maria and Katie.. who have both built my confidence in my weight loss journey.. not only do they provide good service but you also leave with a smile on your face. Not just raising your confidence but they also are behind you 100% and keep you going. Lovely caring staff.

FB Review

I have recently had laser hair removal at Manor Health. The treatment has been fantastic, the results have exceeded my expectations, and I would definitely recommend this clinic. Maria is professional, kind, and makes me feel comfortable.

FB Review

I have had my lips filled by Maria at Manor Health and I'm so pleased with them. I had very little pain as Maria did a brilliant job of numbing them. I have had lip fillers in the past, but would always go to Manor Health now. Thanks Maria, they are fabulous and would highly recommend.

FB Review

I have recently had my second lymphatic drainage treatment for general well being. The procedure itself was very pleasant and relaxing but the effect on my aching legs, especially my knees, was wonderful.

ANTI-AGEING TREATMENTS

RADIO FREQUENCY SKIN TIGHTENING (FACE AND BODY)

The Lynton Promax offers an effective yet comfortable way to achieve facial skin tightening and wrinkle reduction. The specialised facial applicator uses bipolar radiofrequency with vacuum massage. This relaxing treatment promotes the formation of new collagen and elastin and tightens collagen fibers; producing smoother, tighter skin and reduces the appearance of fine lines and wrinkles. Not only is the radiofrequency great for eye and neck lifting, but the introduction of vacuum at this stage offers excellent results for puffy eyes, dark circles and general skin rejuvenation.

SKIN PEELS (IMAGE SKINCARE)

Many skin problems are associated with an excessive build-up of dead skin cells, which make the skin thick and dull, usually clogging the pores. Skin peels can offer a revolutionary way to effectively treat ageing skin, acne, reduce sun damage and hyper pigmentation. This procedure can also help the skin to appear smoother, healthier, plumper and tighter.

Signature

Ideal for skin concerns such as rosacea, dull, dehydrated, pregnant, and sensitive, this peel is a blend of vitamin C, polypeptides, chamomile and green tea. It exfoliates off dead skin cells and delivers highly potent vitamin C and soothing agents into the skin to leave in nourished, calm and healthy.

FRACTIONAL LASER SKIN RESURFACING

Fractional laser skin resurfacing provides total skin rejuvenation. It is recommended for individuals wanting a brighter, more even skin tone, smoother skin texture with improved skin elasticity, a reduction of wrinkles, reduced pore size and improvement to scars (including acne scars) and stretch marks. Improvement is evident after the first session, but for optimum results 3-5 treatment sessions are often advised. Treatment is carried out every 2-6 weeks, depending on the level of rejuvenation required.

SKIN CONDITIONS

THREAD VEINS, ROSACEA, PIGMENTATION & LEG VESSELS

Intense Pulsed Light and Laser can provide a long term solution to facial problems such as red flushing (Rosacea), thread veins, pigmentation & red spots (Cherry Angioma) as well as unsightly leg veins, with minimal downtime or risk in just a few quick and easy treatments.

Both Intense Pulsed Light and Laser systems emit light which is readily absorbed by blood vessels and pigmentation heating them to a point where they are destroyed. Following treatment, the vessels quickly clear as they are reabsorbed by the body, leaving little or no trace of the original lesion. Pigmentation will form a dark and slightly crusty appearance and gradually fade over 10 days following treatment.

ACNE TREATMENT (IPL)

Acne can be effectively treated with Intense Pulsed Light alone or in combination with other clinical treatments. The Intense Pulsed Light system directly targets overactive sebaceous glands, greatly reducing the total number and severity of active lesions, and lessening the inflammation and occurrence of break-outs. The light stimulates the production of new collagen to improve skin texture, and can also reduce the appearance of red or brown areas of skin that are often associated with acne breakouts.
